

An **ENA** Course

7th edition

Trauma Nursing Core Course

Designed for Nurses by Nurses

2016 Elkhart General Hospital TNCC Courses:
May 19-20, Jul 28-29, Nov 3-4

Why You Need TNCC

Optimal trauma patient care is best accomplished when all trauma team members use a systematic, standardized approach to injured patient care. You can help significantly reduce morbidity and mortality of trauma patients by educating yourself on how to be a stronger trauma care team member.

TNCC provides you with cognitive, core-level trauma knowledge and psychomotor skills experience in an interactive format. The hands-on psychomotor skill stations help you incorporate cognitive knowledge into application of skills in a safe practice environment. You'll benefit from having one faculty member for at least every six learners.

- Teamwork and Trauma Care
- Initial Assessment
- Airway, Ventilation, Shock
- Brain, Cranial, Facial, & Spinal Trauma
- Thoracic, Abdominal, Pelvic & Extremity Trauma...and more
- Trauma nursing skill stations
- Opportunity to earn up to 17.65 CE

What Experience Do You Need?

The course is intended for registered nurses (RN) with at least 6 months of clinical nursing experience in an emergency, critical care, or peri-operative setting prior to taking the course. It is recommended that you read the entire manual, complete the on-line case studies, and practice exam prior to attending the course.

Take the Course Today

To verify why TNCC is right for you, visit www.ena.org/coursesandeducation.

In accordance with the Americans with Disabilities Act, please let us know if you have any disability that requires special materials and/or services so that appropriate personnel can be advised.
